

Class: Medical I	Teacher: Bunbury
Assignments: <ul style="list-style-type: none">i. Career One Stop Projectii. Skeletal System Key Termsiii. Skeletal System Workbook	Week: #2; March 23-27, 2020

Hello Medical I Students:

Welcome to week #2 of the Medical I online course. I hope you're all doing well. Please make sure to check ThinkWave for announcements regularly. I hope to hear from you all this week.

- I. For this second week of our class, you all will be doing a Career Exploration project using the following website:
<https://www.careeronestop.org/Videos/CareerVideos/career-videos.aspx>

This project will allow you to select and explore a specific medical career that piques your interest. This is an individual project. First, go to the CareerOneStop website and select Health Sciences. Second, select your career interest (the list goes from Acupuncturist, to Coroner, to Psychologist etc.). Watch the video and/or read the transcript related to your career selection. Thirdly, write a 1-page (12-point, Times New Roman, double-spaced) paper including the following: Overview of career, career outlook, salary, training/credentials/requirements, duties, and why the career interests you. This project will count for extra credit and will replace the second week of class (15 hours) along with Skeletal System Key terms and Workbook.

- II. Skeletal System Key Terms; please submit to my email as an attachment like you did last week for the Muscular System.
- III. Skeletal System Workbook; please submit to my email as an attachment like you did last week for the Muscular System.

Ch. 23 Skeletal System PowerPoint slides are posted on the EAROP website under the Distance Learning Lesson Plans tab and then select Medical Careers (ROP Center – Bunbury)

SEND ALL WORK TO MY EMAIL BY 5PM FRIDAY, MARCH 27, 2020. If you have any questions, please email Ms. Machado amachado@edenrop.org or Mr. B cbunbury@edenrop.org
