

Hi Welding Students,

I hope you're all being safe and staying healthy. Here is the lesson plan for the week of April 6th for you. I hope you find it informative about the workplace. Work ethics are very important in any work environment. Work ethics are the ways employees need to conduct themselves in the work environment. Here is your assignment first I would like you to:

1. Watch the videos and take notes.
 - Personal Qualities: <https://cdn.careeronestop.org/CareerVideos/80-0008.00.mp4>
 - Thinking Skills: <https://cdn.careeronestop.org/CareerVideos/80-0007.00.mp4>
 - Using Information: <https://cdn.careeronestop.org/CareerVideos/80-0003.00.mp4>
 - Basic Skills: <https://cdn.careeronestop.org/CareerVideos/80-0006.00.mp4>
2. Get the key points from each video.
3. Then I would like you to go to YouTube find a documentary on whatever welding process you such as iron workers, sheet metal, Boilermakers, etc.
4. Watch the documentary.
5. Write a full-page summary telling how you saw those work ethics being used in that documentary process.

NOTES:

- Please watch a full documentary on process.
- Take good notes on the videos.
- Really watch the documentary and listen for behavior that relates to the videos and your notes.

Thank you Ms. J
